Indigenous origin and Ethnicity

STEP 1: CASE DETAILS

Select *Query Design* from the *NCIS search* menu.

Go to tab 1 - Case Details, you will see two tick boxes labelled 'Notification' and 'Completion'. These relate to the Case Type and Intent Type data fields.

To search for closed cases that have determined to be of Indigenous origin, tick the 'Completion' box (open cases may have Indigenous origin completed but are considered unconfirmed until the case is closed).

Below this you will see the 'Indigenous origin (AUS)' field. This field contains a range of options for whether a person has been coded as being of Indigenous origin. Select the option that is most appropriate for your search.

The screenshot shows a search filter interface with the following elements:

- Notification
- Completion
- Note: When both selected it is treated as an 'or'
- Case Type: [dropdown]
- Intent Type: [dropdown]
- Perp. Rel.: [dropdown]
- Indigenous Origin (AUS): [dropdown]
- Ethnicity (NZ): [dropdown]
- Inquest Held: [input]
- Case Court: [input]
- Recommendations: [input]

The 'Indigenous Origin (AUS)' dropdown menu is open, showing the following options:

- Aboriginal not Torres Strait Islander
- Both Aboriginal and Torres Strait Islander
- Neither Aboriginal nor Torres Strait Islander
- Still enquiring
- Torres Strait Islander not Aboriginal
- Unlikely to be known

TIPS

Indigenous origin relates exclusively to Australian cases.

Ethnicity is exclusive to New Zealand cases.

To search for New Zealand cases, select the 'Ethnicity (NZ)' field which will open a similar drop down menu with options to choose from.

SEARCHING FOR MULTIPLE OPTIONS

It is not possible to search for all of the Indigenous origin or Ethnicity codes at once.

If you are interested in multiple options, you will need to run your search several times, changing the search parameter, to cover all of the variables needed.

Export the results of each search to Excel and combine them into one spreadsheet for a complete list.
