

# NCIS operational statistics

## Document attachment rates – 1 October 2021

The NCIS Unit provides updated statistics about document attachment on a quarterly basis to assist users in interpreting search results.

Statistics contained in this report are correct as of 1 October 2021.

### By jurisdiction and document type

The level of document attachment varies within the NCIS according to the reporting jurisdiction. Document attachment is dependent upon the status of the case (often not available until the case is closed) and jurisdictions' ability to provide an electronic copy of documents for upload to the NCIS

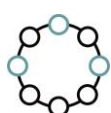

The NCIS Unit continues to work with participating jurisdictions to increase the availability and coverage of information on the NCIS

Statistics for NSW findings relate only to those cases where an inquest was conducted

The NCIS does not currently receive autopsy reports from South Australia

New Zealand data upload to the NCIS is limited to closed cases only

Jurisdiction	% of documents attached			
	Police	Autopsy	Toxicology	Finding
NSW	59	78	66	80
VIC	94	96	98	93
